THE "LIGHTING FURNITURE" IDEA

What are we doing to put power and progress behind the Big Idea of "Lighting Furniture"? It is a thought that must be sold, but it's a thought that will sell more fixtures than all the tricks of the master salesman. It is a thought that will put hundreds of thousands of already-wired houses in the market for the kind of fixtures that the owners want and ought to have.

While they have considered this lighting equipment as *fixtures*, there has been no market in the old-fashioned home. For fixtures are *fixtures*, and there they are. But let them be thought of as "*lighting furniture*" and that's something else. For everybody now and then discards old furniture and buys something new.

Why not, then, all together to talk "Lighting Furniture"! Each one of us should hold himself responsible for spreading this thought among his personal friends and customers. Let's get some of the homes we know refurnished with "Champion Lighting Furniture" right now.
